National Internship Portal
Data Analyst Internship — Indian Army

Dear Hiring Team,

My interest in data analysis began with a fairly unlikely starting point: literature and philosophy. They taught me curiosity about human behaviour, a habit of asking questions, and a desire to look beneath the surface for patterns. Studying statistics gave that curiosity a rigorous framework and data analysis felt like its natural path into a career.

Since then I have built hands-on experience with SQL, Excel, and Power BI through independent projects. I have queried and cleaned large datasets, uncovered meaningful trends, and built dashboards that turn raw numbers into clear insights. I approach every dataset with curiosity and careful observation knowing the most useful findings are rarely obvious at first glance.

What draws me to this internship is the chance to apply those skills in a disciplined real-world setting where accuracy, responsibility, and clear thinking matter. Although I am at the beginning of my career I learn quickly, take ownership of my work, and enjoy solving problems with both analytical rigor and curiosity. I am eager to contribute to a team where thoughtful analysis supports informed decision-making.

Thank you for your time and consideration.

Warm regards,

Ananya Rai Paul
