SUMMARY

B.Sc. Statistics (Honours) graduate with hands-on experience turning large datasets into actionable business insight using SQL, Excel, and Power BI — including revenue trends, customer behavior patterns, and performance dashboards. Interested in applying analytical rigor to growth and marketing problems: understanding user behavior, campaign performance, and what drives retention and monetization.

EDUCATION

B.Sc. Statistics (Honours) — University of North Bengal (Siliguri College) | CGPA: **7.70 / 10**

Coursework: Probability, Regression, Hypothesis Testing, Multivariate Analysis, Time Series, Design of Experiments, Statistical Quality Control, Exploratory Data Analysis

ISC Class XII (2021) — English, Nepali, Mathematics, Physics, Chemistry | Percentage: **74%**

TECHNICAL SKILLS

- **Programming:** Python (working knowledge — scripting, data cleaning, basic analysis)
- **Database / Query:** SQL (Joins, Aggregations, Filtering, Grouping), DBMS concepts, data validation
- **Tools:** Microsoft Excel (Pivot Tables, VLOOKUP, Charts), Power BI (Dashboards, Data Modeling, DAX Basics)
- **Concepts:** Statistics, Data Cleaning, Data Wrangling, Exploratory Data Analysis, Reporting, Problem Solving
- **Soft Skills:** Communication, Documentation, Team Collaboration, Attention to Detail, Analytical Thinking

ACADEMIC PROJECTS

Airline Delay Pattern Analysis | SQL, Excel, Power BI

- Acquired and cleaned flight delay data; wrote SQL queries across routes, airports, and time periods
- Performed data wrangling and analysis to rank high-impact delay bottlenecks with clear rationales
- Built Power BI dashboard and written report to support data-driven operational decisions

Revenue and Product Performance Analysis | SQL, Power BI

- Queried and joined 2,000+ multi-region sales records using SQL to evaluate revenue performance
- Identified top product categories and regional gaps; prepared KPI dashboards for stakeholders
- Documented analysis and recommendations for prioritization and business reporting

Retail Transaction and Seasonal Trend Analysis | Microsoft Excel

- Cleaned and analyzed 5 lakh+ retail transaction records using Pivot Tables and charts
- Applied exploratory data analysis to uncover seasonal trends and customer purchase patterns
- Delivered clear insights for demand timing and reporting use cases

Interactive Sales Performance Dashboard | Power BI

- Designed multi-view Power BI dashboards with data modeling and DAX measures for faster KPI reporting

CERTIFICATIONS

- IBM – Introduction to Data Analytics
- Google – Fundamentals of Digital Marketing

ACHIEVEMENTS

- Represented school in the chess competition in Class 10, building focus and strategic thinking
